## — Faucets and Showers

—

We're constantly striving for originality. No-one wants to be the same as others; everyone wants to be different. We look everywhere for ideas to make us unique. But in the process, we often forget that these ideas are there, inside us. We just need to give them space to unfold. In a place where we can rest and be ourselves. Where we can find inspiration and be as unique as we are. A place that's much more than the start to the day or the prelude to the night. A place that helps us be as individual as we like. And which contributes to our life. Every day.

---

## Quality in everything we do.

---

Durable products are created only by using the highest standards. At Duravit, this begins with the selection of high-quality materials. For example, our faucets use reliable ceramic cartridges that ensure a long service life. Our products are manufactured with the perfect combination of craftsmanship and the latest technology. Before they are launched on the market, the faucets are subjected to stringent tests in terms of washing comfort and spray behavior. This ensures the Duravit Best Match, i.e. formal and technical compatibility with the washbasin.

---

## 5 years guarantee.

---

Because we are convinced of the quality of our products, we offer a voluntary five-year warranty on our fittings. During this period, we guarantee that our products are free from material, workmanship and design defects. If an error is discovered in spite of this, a claim can be made online. For spare parts, we even guarantee the possibility of repurchase for 15 years after the discontinuation of the product in question.

Duravit Products

**5 Years  
Warranty**

---

## **A complete bathroom from a single source.**

---

Duravit has played a major role in shaping the bathroom. With unparalleled bathroom design in form and function. Duravit has been operating for more than 200 years. Today, the company supplies products for all areas of the bathroom. Our faucets, showers and accessories are the perfect addition to any area - from the vanity to the shower to the bathtub. That's because all Duravit products are developed to high standards of design, to provide users with comfort and visual appeal every day. Our faucets, showers and accessories underscores this claim: With modern and timeless shapes as well as intelligent and sustainable functions, they bring a holistic approach to bathroom design.

## Highest quality.

Long-lasting products can only be created to the highest standards. At Duravit it begins with the selection of high-quality materials. For example, our reliable and high-quality ceramic cartridges that promise a long service life. Our products are manufactured using perfect combination of craftsmanship and the latest technologies. Before they are launched on the market, the faucets and showers are subjected to strict tests in terms of quality, washing comfort and spray behavior.

## Our promise of guarantee

Duravit places great emphasis on extreme precision and sustainability in development and production. Duravit provides a voluntary five-year guarantee for all faucets and showers, as well as a 15-year availability guarantee for spare parts.

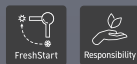

Duravit Products

**5 Years  
Warranty**

### HeatLock

An integrated safety lock at 38°C ensures that bathroom faucets with HeatLock do not pose a risk of scalding. This is especially practical and safe for children and the elderly.

### FreshStart

Duravit FreshStart faucets provide full control over hot water consumption, effectively reducing energy needs in everyday life. Only cold water is allowed to flow when the lever is in the middle position. For hot water, it has to be actively turned to the left. This way, water is heated only when it's really needed.

### AquaControl

With the flexible AquaControl aerator, the exit angle of the faucets' water jet for the washbasin can be easily changed with your finger. The 20° (+/-10°) adjustment is an easy way to avoid unsightly splashing.

### MinusFlow

A flow restrictor limits the flow rate from the outlet. This decreases consumption significantly. At 3.5 liters per minute, MinusFlow faucets use 40% less water than standard faucets, and Minus Flow hand showers are a resource-efficient 9 liters per minute, and a 40% savings.

### AirPlus

AirPlus provides a full, soft jet, as the water in the aerator is enriched with air.

### Touchless

Thanks to infrared sensors, water flows exclusively during use and allows for completely touch-free operation. This not only saves resources, it is also highly hygienic.

### EasyClean

EasyClean equipment is another feature. This makes cleaning overhead showers, hand showers, and washbasin faucets a breeze. Thanks to Easy Clean, it's easy to rub limescale and dirt deposits off of spray discs and aerators. This saves time during cleaning and removes the need for aggressive cleaning agents.

### Click!

On hand showers equipped with Click! technology, it's easy and convenient to select the desired spray mode at the touch of a button.

### Best match

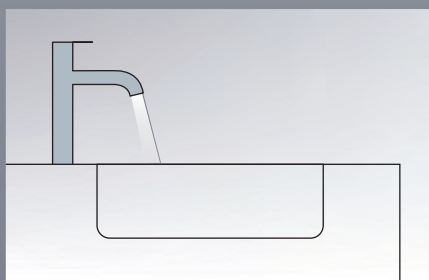

Finding the perfect combination of faucet and washbasin can be difficult. With Duravit Best Match, you can simply click on the model and view the matching recommendations. Special test methods determine the ideal combination.  
[www.duravit.com/bestmatch](http://www.duravit.com/bestmatch)

## Washbasin fittings

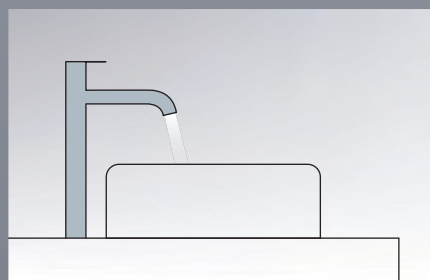

Generous washbasin or compact hand basin, with or without tap hole bench: Duravit has the right fitting for every purpose. Perfectly matched in size and function to the respective combination.

## Shower fittings

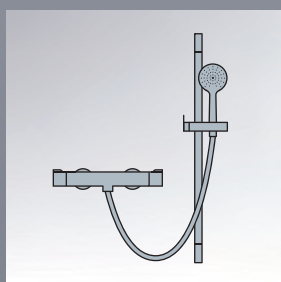

—  
Mounted on the wall, surface-mounted fittings are the ideal bathroom renovation solution. With concealed fittings, the technology is in the wall, which means a particularly tidy look and more space in the shower.

# Wave

Design by Duravit

---

## Classic flowing lines

---

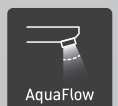

Inspired by the shape of waves, the Wave series ingeniously blends smooth curves and flowing lines reminiscent of the rhythm found in undulating streams. The organic shapes bring lively dynamics to the design of the faucets. The lever that slightly slants upwards gives an intuitive, ergonomic grip.

Best Match: Faucet and washbasin fit together perfectly in terms of function and esthetics.

—  
In a sleek, streamlined shape, the Wave series single-lever washbasin mixers fit seamlessly into any bathroom atmosphere. The well-designed water outlet angle allows a comfortable space for hand washing.

—  
Suitable for every washing area: Three different sizes offer the optimal faucet height for all washing areas, from hand wash basins to washbowls. Wave faucets are available in **Chrome, Black Matt Finishes, Brushed Bronze, Gold Brushed, Stainless steel.**

—

Featuring a flat top with rounded angles, the Wave series single-lever washbasin mixers provide an ergonomic grip and precise temperature adjustment with smooth operation. The imported faucet aerator produces a foamy stream that is soft to touch and reduces water consumption. With the simple rub of your finger, the EasyClean function enables easy rub-off of limescale deposits and residues.

# Wave

The Wave series thermostatic bath mixer guarantees the flow of hot water within a safe temperature range. You can precisely adjust the water temperature with the safety knob, which ensures the temperature never exceeds 38°C for anti-scald protection to create a comfortable and safe bathing experience.

The overhead shower is 250 mm in diameter for a powerful rain-shower spray. Water from the hand shower, which has three spray modes to choose from, rains down on all sides for a full-body rinse. The spray nozzle holes are made of food-grade silicone that is safe, hygienic and easy to clean. Duravit thermostatic shower system features precise temperature control. Its anti-scald knob helps reduce misoperation. You can simply rotate the knob to divert the water outlet between the fixed head shower and the hand shower.

## — Showers

---

## Smart technology

---

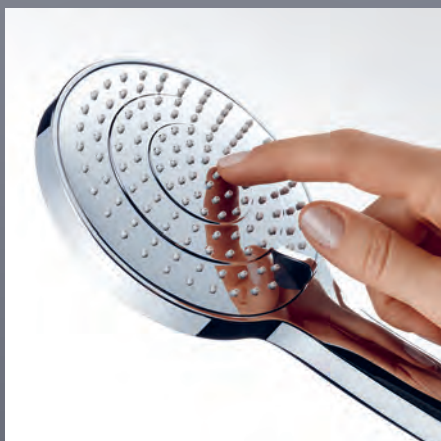

Duravit hand and overhead showers are equipped with smart technology. These help save water and energy, enable easier use, reduce cleaning effort and increase comfort - and showering pleasure.

### MinusFlow

---

You can save water especially while you're showering: For hoses with MinusFlow, the flow rate is limited to max. 9l/min. This reduces hot water and energy consumption by up to 40%

### EasyClean

---

The surfaces are particularly easy to care for and clean. Limescale deposits on the silicone inserts can simply be rubbed off using a finger.

### Click!

---

For the ones with Click! This technology means that the desired spray type - Rain, Pulse or Mono - can be selected with just the press of a button.

---

## Hand showers

---

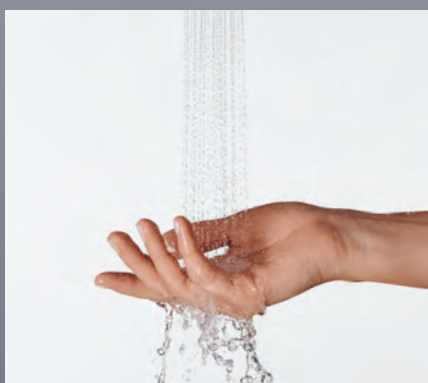

**Elegant and highly functional:** the Duravit hand shower range. You can choose from classic hand showers or baton hand showers, the latter in round or squared design. All hand showers are available in **Chrome** and **Black Matt**, in round shape and additionally in **Chrome/White**. In terms of design, they can be perfectly combined with every Duravit faucet series - and they also feature loads of smart functions.

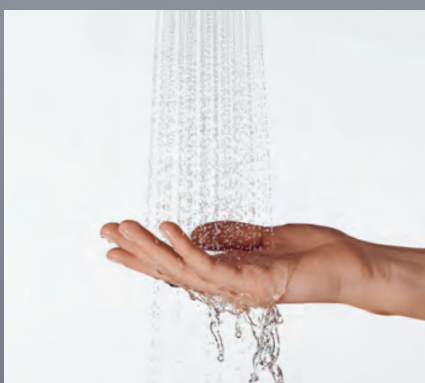

**Water the way you want it.** Water can refresh and relax. It can caress, tingle and massage. Our 3jet hand showers take advantage of this variety. The choice is yours: By rotary diverter or Click! Technology you can easily switch between the different spray modes. According to your mood. For a shower feeling that is always new.

## Thermostatic Shower System Shelf

589.85.090  
SH-3w thermo shower system shelf exp CH

—  
Duravit thermostatic shower system (3-way) combines elegance and convenience with a large shower shelf that provides a shiny, stylish storage option for all shower essentials. With an intuitive control panel, you can click your way through different shower modes. Thanks to the rotational bath spout can create additional space when showering, for maximum comfort.

Rotational bath spout

—  
The bathtub spout can be easily rotated to be concealed under the shelf. This saves space and prevents users from accidentally hitting on the spout.

Buttons for adjusting water volume

—  
Press the button and rotate it to adjust the shower / tub water volume.

Ultra-wide rectangular head shower

—  
360 mm sized head shower creates ultra-wide coverage and brings you a great shower pleasure.

3jet Click! hand shower

—  
3-spray hand shower with Click! change over is simple and convenient at the push of a button.

## Thermostatic Shower Set Shelf

589.85.087  
Thermostatic shower set shelf exposed

—  
Thermostatic shower set shelf can be turned on with the push of a button. It comes with a large white glass shelf that is easy to clean and ideal to place your showering essentials.

#### Large Shelf

—  
The thermostatic shower shelf comes with a classic design. A practical white glass shelf makes it ideal to place your showering essentials.

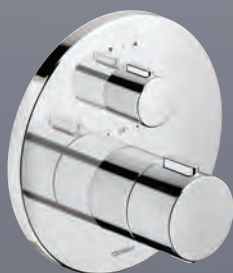

#### EasyClean

—  
The surfaces are easy to clean and care for. Limescale deposits on the silicone inserts can simply be rubbed off using a finger.

## Shower and bath thermostats

**Perfect temperature.** When showering or bathing, thermostats automatically ensure that the preset water temperature remains constant. Also, if water pressure or temperature should change in the pipes.
